

There is no evidence that companion animals can spread COVID-19.

# Can pets spread COVID-19?

At CBI we are continuing to be very busy conducting studies and serving our clients and sponsors during this difficult time!

In addition to our usual capabilities and activities, we are pleased to announce that we are offering and now actively conducting, successful, specialized preclinical efficacy studies assessing test articles in COVID ARDS Studies. Lung damage appears to be the primary cause of death in many COVID mortalities.

Research studies at CBI on animals and COVID-19 Research on SARS-Cov-2 in animals is limited, but are studies are underway to learn more about how various laboratory animal species. Here at CBI, we conduct COVID studies in rodents and rabbits with an emphasis on pulmonary pathology.
