

# Surgical Models

For Preclinical Testing

*Our surgical models and services and resources can help get your research up and running by tailoring a research model to your specific needs.*

## Surgical Modeling Studies at CBI.

Here at CBI, we currently offer a variety of surgical models and services on multiple rodent and large animal species at our AAALAC-accredited production facilities in California. Our surgical services are conducted by highly skilled surgeons with vast experience in veterinary medicine and preclinical animal science that range from simple procedures to highly complex procedures.

*We offers a range of acute and chronic surgical models for use in any drug metabolism pharmacology or safety study type.*
