Thermal Burn Modeling

CBI offers optimized and validated burn models in rodents and minipigs that are both humane and effective. Dermal burns may be induced thermally, by UV light, or chemically. Our clients include small and large pharmaceutical companies, academic organizations and the defense department. We offer thermal and other wound healing models in normal rodents, small animals and pigs and in various disease states, such as hypertension or diabetes.

CHECK OUT ALL THE OTHER SERVICES THAT CBI OFFERS:

TOXICOLOGY | PHARMACOKINETIC | PHARMACOLOGY | DERMATOLOGY | OPHTHALMIC | OCT | THERMAL BURN MODELING
STEM CELL RESEARCH | OTIC STUDIES | VETERINARY | BIOCOMPATIBILITY AND DEVICES | HISTOPATHOLOGY
